PROFESSIONAL SUMMARY

Java Developer focused on Java, Spring Boot, REST APIs, Spring Security, JWT, and MySQL. Experienced in backend development, CRUD operations, authentication, authorization, database design, validation, and API testing.

EXPERIENCE

Java Developer

2026 – Present

Codeline by Rihal

- Develop backend applications using Java and Spring Boot.
- Build REST APIs and CRUD operations.
- Work with MySQL databases.
- Implement Spring Security, JWT, and role-based authorization.
- Apply validation, exception handling, and DTOs.
- Test APIs using Postman.

Software Developer

2023 – 2024

Toulifa

- Developed application features and backend functionality.
- Worked with databases, APIs, testing, and debugging.

Developer Trainee

2023

Code Academy

- Developed applications and REST APIs during intensive practical training.
- Applied software development and problem-solving practices.

EDUCATION

Diploma in Information Technology

2015 – 2018

Shinas College of Technology

GPA: 3.38 / 4.0

TECHNICAL SKILLS

Java

OOP, Collections, Exception Handling

Spring

Spring Boot, Spring MVC, Spring Security

Backend

REST APIs, CRUD, DTOs, Validation, JWT

Database

MySQL, SQL

Tools

IntelliJ IDEA, Postman, Git, GitHub

LANGUAGES

Arabic

Native

English

Good

PROJECTS

Hospital Management System

Java | Spring Boot | MySQL | Spring Security | JWT

- Developed REST APIs for patients, doctors, appointments, and medical records.
- Implemented authentication, authorization, CRUD operations, validation, and database relationships.

Authentication & Authorization System

Java | Spring Boot | Spring Security | JWT | MySQL

- Developed registration, login, email verification, and JWT authentication.
- Implemented password encryption and ADMIN/USER role-based authorization.

Task Management API

Java | Spring Boot | MySQL

Developed CRUD REST APIs with DTOs, validation, and service-layer business logic.

CORE SKILLS
